

Bill format:

Instructions:

Billing method of solar net meter consumption:

Diff. of Imp & Exp is the net meter consumption.

- > If Import is 300 units, Export 250 units, Net meter consumption is (+)50 units import. Billing to be made as 50 units at present tariff (payable by consumer to CESC.
- > If Import is 250 units, Export is 300 units, Net meter consumption is (-)50 units export. Billing method: 50 units x Rs.9.56 = Rs.478/- (payable to consumer by CESC.

50 units x Rs.7.20 = Rs.360/- (payable to consumer by CESC in case of subsidy availed)

- > Fixed charges, applicable tariff & taxes will be made as usual.
- > Solar meter reading is taken for statistical purpose only and not for billing.

“Install solar rooftop system and avail Rs.9.56/unit (without subsidy) on net exported units to CESC grid”.
